

Lisbon International Hip Symposium

November, 16th and 17th 2017
Hospital da Luz Lisboa auditorium

Program

1st day

08h30 Registration

08h45 **Welcome**
Paulo Rego

09h00 **Anatomy & imaging**
Moderators: Pedro Dantas | Oliver Marín-Peña
Relevant anatomy for hip preserving surgery

Hubert Nötzli

Hip vascular supply update: anatomy and importance of lateral femoral circumflex artery

Morteza Kalhor

Arterial topographic anatomy near the femoral head-neck junction

Paulo Rego

Hip MRI imaging in FAI, an update

Vasco Mascarenhas

X-ray and MRI findings in Dysplasia

Dian-zhong Luo

Discussion

10h00 Coffee break

10h30 **Femoroacetabular impingement I - Patients selection**

Moderators: Marc Tey | Maurice Tannast

Differential diagnosis of hip pain

Hubert Nötzli

Clinical examination in FAI

Oliver Marín-Peña

Indications for arthroscopy

Paulo Rego

Indications for open surgery

Oliver Marín-Peña

Discussion

11h30 **Femoroacetabular impingement II - Open surgery**

Moderators: Gennaro Fiorentino | Jorge Cruz de Melo

Technique of surgical hip dislocation (pitfalls)

Hubert Nötzli

Technique and indications of extended retinacular flap & relative neck lengthening

Luigino Turchetto

Technique and indications of head reduction osteotomy

Diego Collado

Computer simulation and guided osteotomy for head reduction

Reinhold Ganz

The experience with SHD in the Chinese Population

Dian-zhong Luo

Discussion

12h30 Lunch

14h00 **Femoroacetabular impingement III - Arthroscopic surgery**

Moderators: Filipe Oliveira | Paulo Rego

Access and decision for peripheral or central compartment first

Pedro Dantas

Cam & pincer arthroscopic treatment - An update

Marc Tey

Lisbon International Hip Symposium

November, 16th and 17th 2017
Hospital da Luz Lisboa auditorium

Program

Strategies for arthroscopic labral repair

Pedro Dantas

Sciatic nerve endoscopic decompression

Filiep Bataillie

Discussion

15h00 **Femoroacetabular impingement IV - Results**

Moderators: Hubert Nötzli | Pedro Pinto

Which MRI findings predict long-term failure after FAI surgery?

Maurice Tannast

What have I learned about arthroscopic labral repair in my experience

Gennaro Fiorentino

Open vs arthroscopic FAI treatment - midterm results

Pedro Pinto

Physical activity level and return to sports after open treatment of femoroacetabular Impingement

Eduardo Novais

Discussion

16h00 **Coffee break**

16h30 **Special topics**

Moderators: Maurice Tannast | Filipe Oliveira

Labral reconstruction with synthetic graft?

Marc Tey

Hip dislocation after low energy injury, does FAI has a role?

Oliver Marín-Peña

Colonna capsule arthroplasty: our 4 years early experience

Dian-zhong Luo

Abductor cuff tendon repair

Marc Tey

Capsule management in hip arthroscopy

Jorge Cruz de Melo

Discussion

17h30 **End of day 1**

2nd day

Live surgery

08h30 **PAO vs Extended medial circumflex artery flap for complex deformity**

Paulo Rego | Hubert Nötzli | Maurice Tannast

12h00 **Coffee break**

12h30 **Children and adolescent hip I**

Moderators: Pedro Dantas | Luigino Turchetto

Hip impingement in SCFE and Perthes Disease

Diego Collado

The pattern of impingement in hips with valgus slip deformity

Morteza Kalhor

Our experience in extended retinacular flap for hip deformities

Michael Millis

Lisbon International Hip Symposium

November, 16th and 17th 2017
Hospital da Luz Lisboa auditorium

Program

**Hip instability after anatomic reduction:
when to add PAO**

Reinhold Ganz

Discussion

13h30 Lunch

14h30 Children & adolescent hip II

Moderators: Eduardo Novais | Diego Collado

**How frequent is femoral malrotation in
the young, painful hip?**

Maurice Tannast

**Results of PAO's done in skeletally
immature patients**

Michael Millis

**Caput flexum a rare deformity of the
growing hip**

Reinhold Ganz

**Biological response of complex
procedures in young hips**

Reinhold Ganz

Discussion

15h30 Hip instability & Dysplasia I

Moderators: Hubert Nötzli | Oliver Marín-Peña

PAO surgical technique

Luigino Turchetto

Strategies to prevent nerve damage in PAO

Morteza Kalhor

PAO for non dysplastic morphologies

Reinhold Ganz

**Results of our reverse PAO's for
overcoverage**

Michael Millis

Discussion

16h30 Coffee break

17h00 Hip instability & Dysplasia III

Moderators: Michael Millis | Diego Collado

Hip dysplasia: the femoral side

Paulo Rego

**Borderline dysplasia: when to do PAO,
when to do arthroscopy**

Filipe Oliveira

**Anteverting PAO or rim trimming in
acetabular retroversion?**

Maurice Tannast

**Level of physical activity before and
after PAO**

Eduardo Novais

Discussion

18h00 Closing remarks

Paulo Rego

18h10 Closure

Chairman:

Paulo Rego

Speakers:

Dian-zhong Luo (CN) | Diego Collado (ES) | Eduardo Novais (USA) | Filip Bataillie (BE) | Filipe Oliveira (PT)
Gennaro Fiorentino (IT) | Hubert Nötzli (CH) | Jorge Cruz de Melo (PT) | Luigino Turchetto (IT) | Marc Tey (ES)
Maurice Tannast (CH) | Michael Millis (USA) | Morteza Kalhor (IR) | Oliver Marín-Peña (ES) | Paulo Rego (PT)
Pedro Dantas (PT) | Pedro Pinto (PT) | Reinhold Ganz (CH) | Vasco Mascarenhas (PT)
